

100%

100% of your fishing and hunting licence fees are invested to create a high quality hunting and fishing experience in Ontario. Every year anglers and hunters invest more than \$65million dollars in fish and wildlife management.

Here fishy fishy! The Ontario fish stocking program focuses on popular sport fish like walleye, salmon and trout.

We fund research and monitoring to help conserve and restore biodiversity, fight habitat loss, pollution, invasive species and overharvest. Our science-based fisheries management ensures a sustainable fishing resource all anglers can enjoy.

Learn to fish

Your money is used to help improve the fishing experience of all anglers. We offer great programs like Fish ON-Line, Learn to Fish and the annual kids fish art contest!

Each year MNRF stocks approximately 8 million fish into more than 1200 water bodies! Fish stocking uses the most efficient and modern technology available to ensure there is minimum stress to the fish.

YOUR LICENCE DOLLARS AT WORK

If you're between the ages of 18 and 64, you need a licence to fish in Ontario. But where does the money you spend on your licence go?
